

Teradata Vantage™ on AWS

Rise Above Needless Bottlenecks

When it comes to analytics platforms, Teradata Vantage™ is incomparable. Combined with the worldwide reach of Amazon Web Services (AWS), customers can use Vantage to achieve the highest levels of advanced analytics.

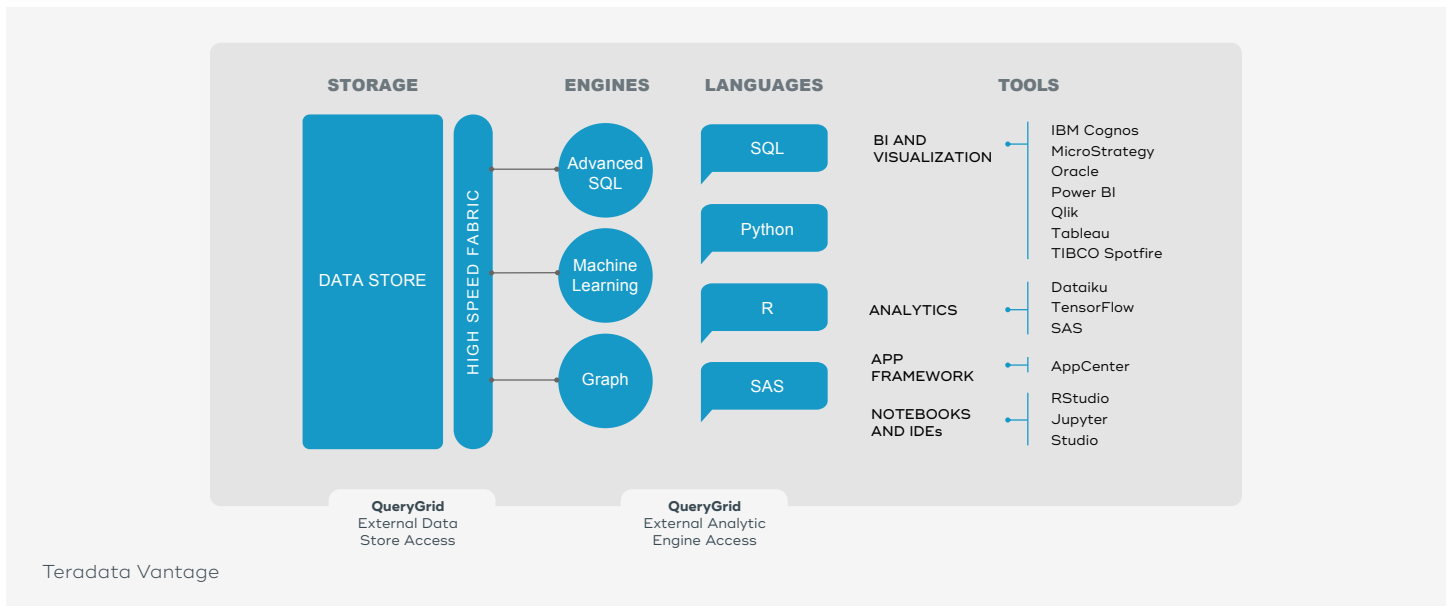

Scale as needed and integrate seamlessly with favorite data pipeline, business intelligence, and visualization tools. Transform data into game-changing insights—whether in Vantage, Amazon S3, EMR, or other data stores.

Powerful Analytic Engines

- **Advanced SQL Engine**—Comes with a huge selection of embedded analytic functions built for high-speed processing, such as attribution, scoring, and 4D analytics.
- **Machine Learning Engine**—Provides more than 180 prebuilt analytic functions to solve business problems by analyzing path, pattern, statistical, and text data.
- **Graph Engine**—Delivers functions that discover relationships between people, products, and processes within a network, such as influencer relationships and fraud detection.

Vantage on AWS Use Cases

- **Access New Features**—Try the latest version of Teradata software to explore new capabilities
- **Try New Ideas Fast**—Conduct discovery analytics and proofs of concept (POCs) to quickly analyze fresh data sets
- **Test and Develop**—Run test/dev workloads separate from on-premises production environments
- **Create Data Labs**—Empower data scientists to load and join data in their own areas within AWS
- **Run Production**—Operationalize analytics with or without on-premises infrastructure
- **Recover Quickly**—Establish an agile AWS-based disaster recovery environment

As-a-Service Delivery

Tired of managing your infrastructure? Vantage on AWS is a managed offering for analytics at scale. It provides secure, scalable, single-tenant environments in which Teradata provisions and maintains the Vantage system. The subscription includes Vantage software, AWS infrastructure, and environment management. Customers can focus on answers, not IT.

- **Performance**—Maximize resource efficiency and get the most value from your investment
- **Security**—Peace of mind, because you don't want to be the next news headline
- **Availability**—Higher uptime, more productive users, and greater business continuity
- **Operations**—Focus on business, not infrastructure, and always be on the latest release

As-a-Service Features

- Flexible pricing models with monthly and annual options
- Subscription to industry-leading Teradata Vantage
- High-performance AWS infrastructure managed by Teradata
- Enterprise security with audited regulatory compliance
- Service availability guarantee for 99.9 percent uptime
- Convenient web-based management console
- Infrastructure services:
 - Onboarding and provisioning assistance
 - System monitoring and maintenance
 - Patch management and software upgrades
 - Encryption of data in motion and at rest
 - Daily backups administered by Teradata

Why Choose As-a-Service?

- **Focus**—Spend time on data-driven business insights, not infrastructure
- **Consistency**—Use the same Teradata software, deployed everywhere
- **Scalability**—Quickly scale AWS resources up, down, out, and in—or stop and then restart later
- **Value**—Simplify budgeting via predictable subscription pricing with no hidden fees
